Chemical Base:
Alcohol, Acetone, Aliphatic Hydrocarbons
Propane / Butane mixture as propellant

Physical Data:
Density at 20 °C: 0,72 g/cm³
Flashpoint: cannot be determined for Aerosols

Description:

Cyberbond 9999 is an ozone friendly universal Cleaner for metals. Oil, grease and dirt quite often prevent a perfect bonding. For this reason metal parts which have to be bonded should be cleaned and degreased before. Just spray Cyberbond 9999 on the dirty parts, let the product be effective and wipe it away. Cyberbond 9999 is also suitable to remove residues of adhesives and sealants. In addition to that it also is a very good break cleaner.

Quite often plastics are dissolved by solvent based cleaners. Therefore make sure before application that Cyberbond 9999 is suitable for your cleaning process. Should not be applied on varnish or leather.

!

The data mentioned in this data sheet, particularly the recommendations for application and use of products are based on our recent knowledge and experience. Due to the fact of having so many different materials involved and conditions of applications which are out of our influence, we strongly recommend to do sufficient tests in order to guarantee that Cyberbond products are suitable for the intended process and applications. Except for wilful acts any liability based on such recommendations or any verbal advice is hereby expressly excluded.
